

LES_CARIATIDES_INDECISES

-La maquette que vous allez construire est en carton bois.

Il s'agit d'un carton fabriqué à partir de pulpe de bois naturel, sans acide et au pH neutre.

-Dans une démarche éco-responsable, les chutes de cartons produites par la réalisation de la maquette sont revalorisées et transformées en papier.

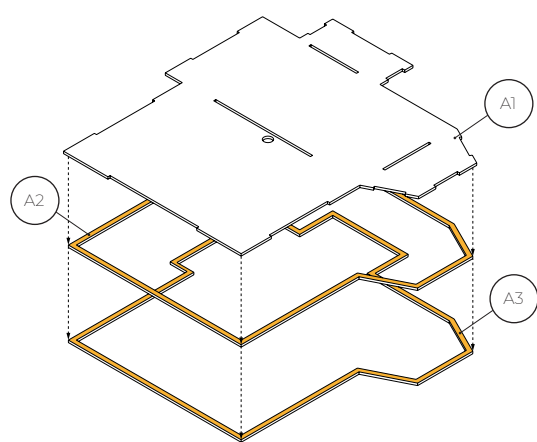

-Le carton bois est un très bon support pour la peinture acrylique, il est donc possible si tel est votre souhait de peindre la maquette.

-Seules les zones signifiées en jaune dans cette présente notice sont à encoller, il est cependant possible de coller les autres éléments si tel est votre souhait.

-Difficulté : Avancée

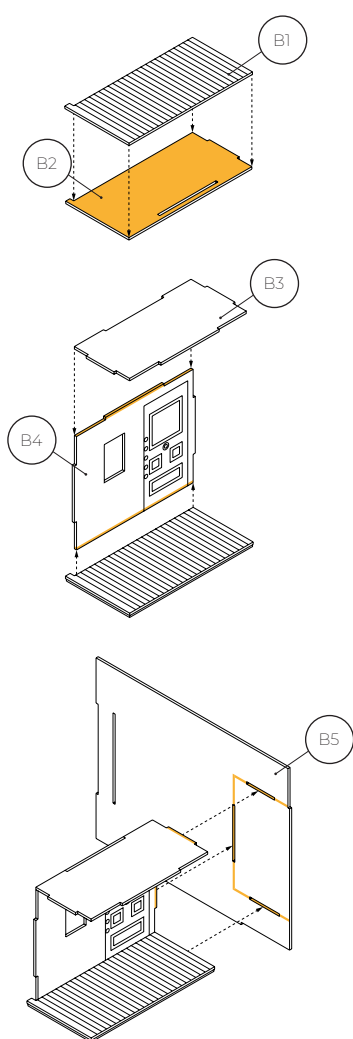

-Temps de montage : environ 8H
